# ABOUT OUR IRIS OFFERINGS

Waldean Farm is less than a half hour's drive from the huge steel mills of Gary. Many of our best young men, even before they finish high school, find employment there or in similar industries. The labor, they find, is less arduous and the "take home" pay more enticing.

From an original six acres of Iris, including hundreds of standard varieties, we have gradually reduced our holdings to a half acre or less, in conformity with local labor conditions. Our customers have had the benefit of savings as high as 50 per cent during the years this liquidation has been taking place. Similar savings can be yours—if you order at once, while our supply of Iris lasts.

We ask that wherever possible you suggest substitute varieties, in case desired variety is sold out. Where no substitution will be accepted, mark your order accordingly so that immediate refund can be made where supply is exhausted.

We appreciate the business sent to us throughout the years, and thank you in advance for your 1952 orders.

## TALL BEARDED IRIS
